2018 Bently Heritage Trail Overview

1) Routine brushing on most of the trail occurred in March and November. Members of LifePoint Church also helped with brushing on portions of the trail in May.

2) Isaac Smith completed a 24-foot long section of boardwalk in June with family and fellow scouts for his Eagle Scout project.

3) Two broken fiberglass trail marker posts were replaced.
4) A bench was installed along the South Loop.

5) One of the boardwalks was displaced during the April flood event. The boardwalk was taken apart; reinstalled and anchored with t-posts.

6) A trailhead marker was installed and mounted to a wooden post.
2019 Bently Heritage Trail Work Plan

- Up to three additional boardwalks may be built across intermittent wet areas on the Middle and North Loop.
- Routine brushing on the entire trail.
- Install updated trail maps at six trail junctions.

2018 Clear Creek Trail System Overview

1) The upper 6.5-mile section of the trail between Clear Creek Junction and Spooner Summit was built during spring/summer and opened in August. Grace Christian Academy and GE participated with trail work days. Trail signs and maps were updated.
2) General maintenance was performed on the middle/upper third of the trail including brushing and tread repair. Three areas were widened and a slickrock area further hammered out.

3) The second switchback above Finger Gap Rock was realigned and extended an additional 40 feet to reduce grade, improve turn sightline and safety, and reduce rutting/skidding into the turn.

4) General maintenance was performed on the middle third of the trail between the lower bridge and Clear Creek Junction including brushing and tread work.

5) The first switchback below Five Valleys View was realigned and extended another twenty feet to reduce grade, improve turn sightline and safety, and reduce rutting/skidding into the turn.

6) Two fallen trees were removed.
7) The trail backslope and base was armored with large rocks at the emergency access road crossing to protect the road edge and trail from water runoff.

**2019 Clear Creek Trail Work Plan**

- Routine brushing and tread work will occur on the entire trail.
- Improve four switchbacks and widen two blind turns.
- Divert water coming down an old road that is damaging the trail near the upper Jacks Valley Trailhead.
- Widen a draw crossing on the Clear Creek Connector to improve turn radius.
- Major trail widening and root removal on the south side of the upper bridge.
- Continue collaboration with partners to improve and formalize the Clear Creek Trailhead.
2018 Fay-Luther/Jobs Peak Ranch Trail System Overview

1) The south half of the trail system had general maintenance performed including winter drainage prep work, social route decommissioning and brushing.

2) The Fay-Luther/Jobs Peak Ranch Trail had waterbars cleaned out.

3) The bridge and riparian spring areas on the Fay-Luther/Jobs Peak Ranch Trail were brushed out and tread work performed.

4) Four fallen trees were removed.

5) CVTA funded Qualcon Contractors $17,500 to repave 2,500 square feet of the Fay-Luther Trailhead parking entrance.
6) The Fay-Luther/Jobs Peak Ranch Trail and Valley View Loop were brushed out.

7) Three educational and trail use signs were installed at the Fay-Luther Trailhead.

8) A large spring that developed last year on the Fay-Luther/Jobs Peak Ranch Trail dried up and transitioned into a boggy seep. Crushed rock was packed over the muddy bog sections and water diverted across the trail.
New spring section filled with crushed rock

2019 Fay-Luther/Jobs Peak Ranch Trail System Work Plan

✓ Routine brushing and drainage work will occur throughout the trail system.

2018 Genoa Trail System Overview

1) The lower two miles of the Sierra Canyon Trail had brushing, social route decommissioning and tread work performed twice.

2) The first two miles above the Genoa Canyon Trailhead had rock and slough clearing performed three times.

3) Routine brushing occurred in the general area around the Sierra Canyon Trail bridge, the lower Genoa Canyon creek crossing and the Adams Canyon crossing.

4) The entire Genoa Loop had routine brushing, slough and rock clearing performed.
5) The upper and middle Sierra Canyon Trail was brushed out and rocks cleared. A significant brushing effort was completed on the upper two trail miles.

6) An additional dog courtesy sign was installed at the Sierra Canyon Trailhead to encourage dog owners to keep their dog controlled/leashed in the neighborhood.

![Dog courtesy sign](image)

7) Five fallen trees were removed.

![Fallen tree removed](image)
8) A broken sign was replaced on the Sierra Canyon Trail.

9) A large boulder fell onto the trail in Genoa Canyon and moved to the side.

10) The rock causeway on the upper crossing of Sierra Canyon Creek was expanded several additional feet to cover an additional boggy area.
2019 Genoa Trail System Work Plan

✓ Routine tread maintenance, brushing, slough and rock cleanup will occur throughout the entire trail system.

✓ Widen a blind turn in lower Genoa Canyon.

✓ Guide bumpers may be placed on a few turns in lower Genoa Canyon.

2018 Pinyon Trail Overview

1) Routine tread maintenance occurred on the trail.

2018 Pinyon Trail Work Plan

✓ Routine tread maintenance will occur on the trail.

2018 Miscellaneous Overview

1) QR Codes have been installed at trailhead kiosk locations to provide users with digital on-site trail information linked to the CVTA website.

2) Polyflex CVTA logos have been installed for each trail system on various kiosks and mileage posts.

3) A new CVTA trails brochure format was created and printed.

4) New CVTA shirts were printed with trail names listed.

5) New CVTA trail bandanas were printed.
